RE: Compostech Compostable Natural and Green Printed Bags

Dear Comercializadora Mintech SpA:

This is to confirm that Compostech Compostable Natural and Green Printed Bags are produced by BPI-approved manufacturers from BPI-certified materials. The products listed in Table 1 of this agreement are authorized to carry the BPI Certification Marks (shown on this page) because they meet all of the requirements of ASTM D6400 or ASTM D6868 and BPI's certification scheme for breaking down safely in a professionally managed composting facility without compromising the quality of the finished compost. Only products listed on Table 1 are covered by the BPI certification.

Should anyone have questions, including about specific SKUs or item numbers, they can contact BPI directly by phone or email.

Sincerely,

A handwritten signature in black ink, appearing to read "Rhodes Yepsen", is written over a light blue horizontal line.

Rhodes Yepsen  
Executive Director
